Same Support Dataset - PDF Ingestion Version

This PDF intentionally contains the same business/support information as the Excel workbook and JSON API payload. It is designed to demonstrate document ingestion, text extraction, chunking and RAG retrieval.

Orders

Order ID	Customer	SKU	Product	Status	Delivered / ETA	Price	Issue
QS-1001	Alice Johnson	HPH-01	Wireless Headphones	delivered	2026-09-26	\$79.99	damaged

QS-1003	Carla Gomez	KBD-03	Mechanical Keyboard	delivered	2026-09-24	\$99.00	not working

Inventory

SKU	Product	Stock
HPH-01	Wireless Headphones	8
BAG-02	Travel Backpack	12
KBD-03	Mechanical Keyboard	0

Support Policies

Policy	Text
Damaged item replacement	A delivered item reported damaged within 30 days may be replaced if replacement stock is available. Human approval is required before creating the replacement.
Refund approval	Refunds require human approval. The agent may prepare a refund request but must not issue a refund automatically.
Shipped order status	For orders that are still in transit, provide the current status and ETA. Do not create a replacement until the order is delivered unless a separate exception policy applies.
Out-of-stock replacement	If an eligible replacement item has zero stock, do not promise immediate replacement. Create or recommend a support ticket for manual follow-up.

Demo query to use with all three ingestion methods: "My order QS-1001 arrived damaged. Can I get a replacement?"
